GROWN AND FOR SALE BY

HIGHTSTOWN, NEW JERSEY

SEASON 1921-1922

THE GLADIOLUS

This flower has been so much improved by the work of plant-breeders that we now have all the colors imaginable in both selfs and combinations.

The interest developed in the Gladiolus in the past few years has been wonderfully progressive and many things are accountable for the greatly increased popularity.

The period of bloom can be extended by consecutive planting, beyond any other flower, so for table decoration it has no equal. Its easy culture appeals to all. Its adaptability makes it a great favorite and freedom from disease and insect pests is another great asset.

The demands of the Gladiolus are the simplest. Rotted stable manure or bone-meal if the soil is not strong, otherwise no fertilizers are needed. Plentiful water if the rainfall is limited, full exposure to the sun, free air and no crowding for best results.

The corm, according to its size, is placed 2 to 4 inches apart in the row and 2 to 6 inches deep, planting deeper in light soils than in heavy.

In the fall when the foliage shows maturity, by turning yellow, they should be lifted, the tops cut off and the bulb laid in a dry, airy place for a week or ten days to cure. The old corm can then be removed and the new one put in boxes or bags and stored in a dry, cool, frost-proof place for the winter.

We have added to our list many new varieties—most of them chosen upon their merits, as to beauty, growth and production, and we consider all which we offer herein worthy of cultivation.

TERMS OF SALE

All offerings are made subject to prior sale and on varieties priced only each and by the dozen our stock is limited; we therefore suggest early ordering.

We exert careful care to have all bulbs packed true to name, but do not assume any responsibility for errors, except to replace any that may prove untrue.

Prices do not include transportation, except at rates per dozen and less which are postpaid in Zones 1, 2, 3, 4 and 5. In Zones 6, 7 and 8 add 5 cents per dozen for excess postage.

No orders accepted for less than \$1.00.

Cash must accompany all orders and 5 per cent. discount will be allowed on purchases of \$5.00 or over.

Believing bulbs one and one-quarter inches and over in diameter are worth as much and in many cases more than one and one-half and up, we classify as follows: 1st size, 11-4in. and up; 2nd, 1 to 1 1-4-in.; 3rd, 3-4 to 1-in.; 4th, 1-2 to 3-4; 5th, 1-2 -in. and under.

Prices quoted are for best blooming sized bulbs 1 1-4-in. and over, unless otherwise noted.

ALBANIA
(Kemp, 1921)

First Prize Boston and New York, August, 1921.

This is the most pleasing white variety we have yet seen. The flower is wide open, four inches and over in diameter, petals are broad, with well rounded tips and beautifully crimped edges, making a beautiful finish. The background is of the purest glistening white, with very faint light pink mottling, which is noticeable only on close observation. To all intents and purposes it is a pure white. The flowers are well placed on the spike and close enough together to obliterate spaces between the flowers, making an ideal and the best white for use in floral design work ever originated. Five flowers open at a time, and a splendid keeper when cut. Height four feet, 14-16 flowers to the spike, very healthy and a bountiful producer of good growable bulblets.

**Price, large bulbs, \$1.00 each. 6 for \$5.50.

The color is a rich creamy white, delicately tinted and flaked rose, with tinge of yellow in the throat, blended with delicate rose feathering on rear half of lower petals. One of the showiest varieties for garden and house decoration, resembling a large lily rather than a Gladiolus. A splendid forcing variety, and when grown under glass all flaking of petals is absent. LE MARECHAL FOCH

One of the best Holland productions. The flowers are much larger than America and fully three weeks earlier, having all the good qualities of America and Halley and none of the weaknesses of either, making it pre-eminent as a cut flower variety. Its color is a beautiful shade of light pink. No other flower opens up as well and stand the heat as well as this one.

40c each. \$4.00 per Dozen.

Bulblets \$10 per 1000. Liberal discount to the trade on large quantities.

Netherlands (New). This was sent us from Holland a few years ago as a substitute for Hollinda. We found it to possess so much merit as a cut flower variety, and being without a name, we decided to introduce it under the appropriate name of Netherlands. The flower is fully as large as Halley and of the same form, but comes in bloom a few days later than Halley. The color is a beautiful salmon rose, with ruby feather-like markings on the interior petals; a favorite color that never becomes tiresome. During the past season large quantities of these exquisite blooms were shipped to the Philadelphia wholesale flower market and brought top prices throughout the season. It is a strong, clean, healthy grower; an enormous producer of very large bulblets that grow as readily as corn, and nearly every one will make first size bulbs the second year. A sure money-maker for the grower of glad blooms for market whether grown outside or under glass.

Prices, large bulbs 10c each, \$1.00 per dozen, \$7.50 per 100.

THE FLOWER GROWER champions the cause of the summer garden flowers. It is published monthly and each issue abounds with helpful information on how to have the best of success with those increasingly popular flowers, the Gladiolus, the Peony, the Iris, the Dahlia, the Rose, etc. The Flower Grower should be in the hands of all who grow flowers.

The Flower Grower tells what sorts to grow, how and when to plant, when to cut the bloom for shipping and for home decoration, and how to save and store the seeds, bulbs, etc. In short, every phase of flower culture is taken care of, and practical facts and information on summer-flowering plants of all kinds comprises its contents. The magazine is a great contribution to the floral literature of the world.

Write your name and address below and enclose it with \$1.50 or \$3.50 (stamps, money or check) in an envelope addressed to

EXTRA CHOICE GLADIOLUS SEED

The glad enthusiast who has never grown new varieties from seed has missed the most interesting experience connected with the cultivation of this queen of all the summer flowering bulbs.

The seed we are offering are saved from Pink Wonder, six white varieties, including White Wonder, Albania and Early Snowflake, many extra fine hybrids of Golden Measure, Primulinus Hybrids, and numerous fine hybrids of other types. Many a gem of the first water is stored in these seeds, and many wonderfully agreeable surprises await all who plant them with our simple method of growing. Anyone can succeed with them. A few small wooden boxes, some good soil, and a few square feet of room in which to place them, is all that is necessary. We grow many thousands of seedlings yearly in boxes on less than 100 square feet of space.

Full instructions for growing on every packet.

Price 75c per packet; 3 packets for \$2.00, postpaid.
